Biennial Report
OF THE
Executive Board
OF THE
MONTANA STATE INDUSTRIAL SCHOOL
Miles City, Montana

<p>FOR THE TWO YEARS ENDED JUNE 30, 1936</p>
--

:: WITH RECOMMENDATIONS ::

TO THE
Hon. Roy E. Ayers, Governor
AND THE
Members of the 25th Legislative Assembly

HEREWITH is submitted a report of the Montana State Industrial School for the two years ended June 30, 1936, including financial tables and movement of population:

POPULATION

Daily average population for the first year of the biennium was 135, and for the last year of the biennium was 124. One hundred eleven new boys were received during the two years.

HEALTH

Very little sickness has occurred during the biennium, except that we had a few cases of scarlet fever in a light form; also about a dozen cases of mumps, all of which made good recoveries. One boy died from sepsis and an internal hydrocephalus, and one boy was drowned while trying to swim the Yellowstone river after escaping from the school the previous night. The health of the boys is well looked after by specialists of the Garberson Clinic of Miles City. All boys are given a thorough physical examination soon after admission to the school. Visits are made to the school by doctors whenever necessary.

A dentist from the city examines the boys' teeth once each year, and cares for the same whenever necessary.

DISCIPLINE

The discipline has been quite satisfactory and is maintained almost entirely by loss of privileges and loss of merits.

SCHOOL

School in the elementary grades up to and including the eighth grade, has been conducted for nine months each year and most of the boys have made excellent progress. Thirty boys have attended high school at the Custer County High School and several have graduated from there. One boy attended the State University at Missoula last term, his expenses having been paid by the Institution. His work was satisfactory and he is again attending the University this year and it is expected he will graduate at the finish of school next June,

RELIGIOUS SERVICES

Protestant services are conducted every Sunday and Catholic services are held once each month. Pastors from the different churches in town conduct these services. Sunday School is held each Sunday morning.

PAROLE DEPARTMENT

We have of record in this department two hundred boys on full and conditional parole.

With few exceptions our boys are employed at useful occupations within the State and many of them are following vocations which they took up here. About sixty of our paroled boys are employed in CCC Camps, the Forestry Service, industrial and agricultural work and many are holding positions of responsibility.

The Parole Officer has contacted those on parole, their families and employers at every available opportunity. Families of the boys at the School who expect to leave in the near future are also visited. In cases of employers of boys on parole, reports of an encouraging nature are far in excess of those to the contrary. Justification for the continuance of the department is very apparent.

IMPROVEMENTS

Two dormitories for the boys have been completed during the biennium and are now occupied, giving us room to segregate our boys into smaller groups, much to the boys' advantage. The cottages were built from a Federal loan and grant and cost, complete with equipment, \$77,642.64.

SHOPS

All of the shops have been operated during the two years and most of the boys have made satisfactory progress at their chosen vocations under competent instructors. On account of the occupancy of the new cottages another Company Officer was employed. We were fortunate in getting a man for this position who is also a printer and in addition to his work with the company of boys he also acts as printing instructor. The boys in this shop are thus afforded much better advantages in learning this trade. It is working out very satisfactorily.

FARM AND GARDEN

On account of the severe drought the past three years our farm and garden crops have been limited, pastures were burned up and a great deal of feed for the stock had to be purchased. The year just past has been the worst in many years. Hay and grain crops were almost a failure and this was also true of the garden produce. It has been necessary this year to purchase about \$7,000 worth of hay and feed and some vegetables, and it will still be necessary to buy seed potatoes for next spring. On this account our appropriation will be short about \$5,000.

FINANCIAL

Our appropriations for the two years past were liberal but on account of the extreme drought and insect ravages, crops were so reduced that it was necessary to purchase great quantities of hay and feed and some vegetables. This has been such a drain on our funds that it becomes necessary for us to ask for an additional appropriation of \$5,000 to carry us through the present year.

RECOMMENDATIONS

A special appropriation of \$12,000 is requested for the purpose of building a tunnel connecting the boiler room with five of the new buildings and the purchase of new pipe and fittings for same. Although the pipes at present are laid in insulation they are fast becoming eaten out from the alkali in the soil and must be replaced. By the building of the tunnel and hanging the pipes so they will keep dry, replacement for many years will be avoided.

We also recommend a special appropriation of \$4,000 for the purchase of a typesetting machine for the print shop. The machine will give the students opportunity to study actual conditions in modern printing plants while here and thus better equip them to meet the demand of their future employers as they carry on after leaving the School.

Requests for appropriations for the biennium for maintenance have been submitted to the Budget Commission and will be found in its report.

Respectfully submitted,

A. C. DORR

E. B. WINTER

L. C. GIESELER
